Sequence 1, Application US/09664186

Patent No. 6815537

GENERAL INFORMATION:

APPLICANT: Mayne, Jay

APPLICANT: Wayne, Jay

TITLE OF INVENTION: Wethod For Construction Of Thermus-E. coli Shuttle

TITLE OF INVENTION: Wethors And Identification of Two Thermus Plasmid

TITLE OF INVENTION: Replication Origins

FILE REFERENCE: Thermus Shuttle Vector

CURRENT APPLICATION NUMBER: US/09/664,186

CURRENT PILING DATE: 2000-09-18

PRIOR PLING DATE: 1998-08-14

PRIOR FILING DATE: 1998-08-14

NUMBER OF SEQ ID NOS: 30

SOFTWARE: Patentin Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               GENERAL INFORMATION:

```

g

```
APPLICANT: Richards, Cynthia Ann
APPLICANT: Huber, Brian E.
TITLE OF INVENTION: Transcriptional Regulatory Sequence of Carcinoembryonic
Patent No. 6194211
TITLE OF INVENTION: Antigen for Expression Targeting
FILE REFERENCE: PHISOBUSW
CURRENT APPLICATION NUMBER: US/08/646,301A
CURRENT FILING DATE: 1996-05-16
SOFTWARE: PatentIn Ver. 2.1
SEQ ID NO 8
LENGTH: 14
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 8, Application US/08646301A
Patent No. 6194211
GENERAL INFORMATION:
APPLICANT: Richards, Cynthia Ann
APPLICANT: Huber, Brian E.
TITLE OF INVENTION: Transcriptional Regulatory Sequence of Carcinoembryonic Patent No. 6194211
TITLE OF INVENTION: Antigen for Expression Targeting
FILE REFERENCE: PB1508USW
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     OTHER INFORMATION: Description of Artificial Sequence: consensus;
OTHER INFORMATION: sequence A4alt from DNA Sequence 1:3-11 (1990);

Sequence 39, Application US/08646789A

Patent No. 6022863

GENERAL INFORMATION:
APPLICANT: Peyman, John A.
TITLE OF INVENTION: REGULATION OF GENE EXPRESSION
NUMBER OF SEQUENCES: 101
CORRESPONDENCE ADDRESS:
ADDRESSEE: PENNIE & EDMONDS
STREET: 1155 Avenue of the Americas
CITY: New York
STATE: New York
COUNTRY: U.S.A.

Patent No. 6569681
GENERAL INFORMATION:
APPLICANT: Ivanov, Evquenii
TITLE OF INVENTION: METHODS OF IMPROVING HOMOLOGOUS RECOMBINATION
FILE REPERENCE: 10278/016001
CURRENT APPLICANTON NUMBER: US/09/525,160B
CURRENT FILING DATE: 2000-03-14
NUMBER OF SEQ ID NOS: 10
SOFTWARE: FastSEQ for Windows Version 4.0
LENGTH: 14

Patent No. 6620795
GENERAL INFORMATION:
APPLICANT: Debs, Robert J.
Zhu, Ning
TITLE OF INVENTION: A Mammalian Transformation Complex
Comprising a Lipid Carrier and DNA Encoding CFTR
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         0; Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Length 15;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             COMPUTER: IBM PC Compatible

Patent No. 6620795
GENERAL INFORMATION:
APPLICANT: Debs, Robert J.
APPLICANT: Debs, Ning
TITLE OF INVENTION: A mammalian Transformation Complex
Comprising a Lipid Carrier and DNA Encoding CFTR
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            COMPUTER: IBM PC compatible

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    d
                                                                                                                                                                                                                                                                                                                                                                                                                                                               US-09-928-385B-24

US-09-928-385B-24

Sequence 24, Application US/09928385B

Sequence 24, Application US/09928385B

Sequence 24, Application US/09928385B

GENERAL INFORMATION

APPLICANT: Heyduk, Tomasz

TITLE OF INVENTION: A Rapid and Sensitive Proximity-Based Assay for the Detection

TITLE OF INVENTION: and Quantification of DNA Binding Proteins

FILE REFERENCE: 16153-7963

CURRENT APPLICATION NUMBER: US/09/928,385B

CURRENT FILING DATE: 2002-01-14

NUMBER OF SEQ ID NOS: 24

LENGTH: 10
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              TITLE OF INVENTION: A Rapid and Sensitive Proximity-Based Assay for the Detection TITLE OF INVENTION: A Rapid and Sensitive Proximity-Based Assay for the Detection TITLE OF INVENTION: and Quantification of DNA Binding Proteins FILS3-79633 CURRENT APPLICATION NUMBER: US/99/928,3858 CURRENT FILING DATE: 2002-01-14 NUMBER OF SEQ ID NOS: 24 LENGTH: 10

Sequence 133, Application US/09816763

Patent No. US20020110814A1

GENERAL INFORMATION:
APPLICANT: Remacle, Jose
APPLICANT: Remacle, Patricia
APPLICANT: REMACH, MARTHON:
TITLE OF INVENTION: BETECTION AND/OR THE QUANTIFICATION OF TRANSCRIPTIONAL
TITLE OF INVENTION: DETECTION AND/OR THE QUANTIFICATION OF TRANSCRIPTIONAL
TITLE OF INVENTION: DETECTION AND/OR THE QUANTIFICATION OF TRANSCRIPTIONAL
TITLE OF INVENTION: DETECTION AND/OR THE QUANTIFICATION OF TRANSCRIPTIONAL
TITLE OF INVENTION: DETECTION AND/OR THE QUANTIFICATION NUMBER: 2001-03-23
CURRENT FILING DATE: 2000-03-24

NUMBER OF SEQ ID NOS: 150

SEQ ID NO 133
LENGTH: 21

LENGTH: 21
                                                                                                                                                                                                                                                                                                                                                                                 APPLICANT: Remacle, Jose
APPLICANT: Renard, Patricia

Sequence 5, Application US/10017178

Publication No. US20020142287A1

GENERAL INFORMATION:
APPLICANT: Yamamoto, Hirotaka
APPLICANT: Wookal, Joseph R.
TITLE OF INVENTION: High Throughput Assay to Detect Inhibitors of the MAP Kinase Path
FILE REFERENCE: 99,123-D
CURRENT APPLICATION NUMBER: US/10/017,178
FRICH APPLICATION NUMBER: US 60/255,548
PRIOR FILING DATE: 2000-12-14

NUMBER OF SEQ ID NOS: 10
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                APPLICANT: Remacle, Jose
